A misty forest scene with tall trees and sunlight filtering through the canopy. The sun is visible in the upper left, creating a bright glow and lens flare. The trees are tall and thin, with some foliage showing autumn colors. The overall atmosphere is serene and natural.

TRUE NORTH OUTDOOR

TRUE NORTH - MORE OUTDOOR

True North hardware offer you a wide range of products in highest quality. Tents, sleepingbags, backpacks and accessories for all weather conditions. Every material, fabric and design element is chosen to simplify your outdoor life.

True North offers you both Nordic traditional tunnel and self standing dome tents. The tunnel tents are very easy to set up and offer you a generous space. This type of tents requires guylines and pegs to stand stably. The tunnel tents are the most common tents in Scandinavia because of unstable weather and a lot of rain. The extra space gives you opportunity to cook inside. Self standing dome tents are stable also without pegs and guylines, this type of tents are preferred under tough pitching conditions. All outer tents are produced in Duralite WP+ polyester ripstop. The roof of the inner tents are made from high quality breathable polyester and the floor from highly waterproof PU polyester. All accessories are carefully chosen to offer you a great product.

All ventilations and door openings are covered with mosquito nets.

Ventilation on each vestibule for better all weather comfort.

Lightweight poles in the best aluminum 7075 quality. Anodized in red colour

Guy lines and attachments in best quality for stability in rough conditions.

"Easy set up" channel closed on one side. Stronger fabric on critical areas.

Adjustable peg attachment. Metal ring and webbing straps in high quality.

High bathtub floor keeps you dry in all weather conditions.

Several integrated pockets and laundry rope attached on inner tent.

Adjustable line runner on guy lines.

An adjustable pole holder makes it easy to pitch the tent in all weather conditions

DURALITE® WP+

The "Trek" is a combination of a tunnel and self-supporting tent that results in very large spaces. This tent has a high bathtub floor to stop water getting trough in rough conditions. Excellent ventilating properties to inhibit condensation. Linked inner and outer tent for simultaneous pitching. Extended vestibule and entrance with mosquito net.

TRUE NORTH – MORE OUTDOOR

True North hardware offer you a wide range of products in highest quality. Tents, sleepingbags, backpacks and accessories for all weather conditions. Every material, fabric and design elements is chosen to simplify your outdoor life.

True North Trek sleepingbags are produced to give the best comfort. Shell fabric is Duralite WP 230 soft polyester ripstop, inside is an "easy turn around" glossy fabric for best sleeping comfort. True North are using Thermoloft fibres for best insulation and low weight.

True North Tarfala is a series updated sleeping bags. Shell fabric is the new Duralite WP 260 with high density and special treatment to make fabric soft and comfortable. As inside lining we use micro glossy fabric with "easy turn around" function. We use Thermoloft X fibres for better insulation together with low weight. Tarfala have zipper on both side to make it comfortable to use.

THERMOLOFT FIBER INSULATION

- Multi-hole fibre insulation
- High insulation capacity
- Smooth with high softness
- Durable with long life span
- Siliconised

Temperature rating

Please be advised that the sleeping comfort is depending on your physical condition, body weight, clothing and gender. In the extreme range a strong sensation of cold should be expected. Always adapt your clothing to the current temperature for best possible comfort.

The Upper Limit of Comfort is the highest temperature that you can sleep without sweating profusely. Usually this is defined with the ventilation zippers open, arms outside the bag and the hood open.

The Lower Limit of comfort is usually defined as the lowest temperature at which a person has eight hours of sleep without waking.

Extreme Temperature is the lowest temperature at which the sleeping bag protects the user from hypothermia. This is subject to a variety of conditions but is usually defined as six hours of uncomfortable sleep with diminishing the body core temperature to a dangerous level.
